Dermatology Intake Form

Please tell us why you made the appointment:

Have you received a diagnosis or care for this issue before?

If so, what treatments have you tried?

How did they work?

What are you currently using to treat your condition?

Do you use any alternative or “natural” treatments for your health?

Do you have any personal history of skin disease or skin cancer?

Do you have a family history of skin disease/skin cancer?

It’s important to be able to see your skin clearly to make an accurate diagnosis. In preparation for your visit, please submit **up to** 3 high quality photographs of your areas of concern.
